Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a method of determining coagulation, classified in class 435, subclass 13.
- II. Claims 19-21, drawn to a method of differentiating a patient, unclassifiable.

The inventions are distinct, each from the other because:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are separate and distinct inventions where determining coagulation is not related to differentiating patients. It is noted that all humans would generally be expected to have FV. Further, the method steps of Group II and not related to the method steps of Group I.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
